No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                        US-10-797-893-6

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 4, Al

Sequence 2, Application US/10093317

Patent No. 6762043

GENERAL.INFORMATION:

APPLICAMT: Beraud, Christophe

TITLE OF INVENTION: No. 6762043el motor proteins and methods for TITLE OF INVENTION: their use

FILE REFERENCE: 1044

CURRENT APPLICATION NUMBER: US/10/093,317

CURRENT FILING DATE: 2002-03-06

PRIOR FILING DATE: 2000-11-28

NUMBER OF SEQ ID NOS: 8

SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     .
